

CURRICULUM VITAE

NEAL B. NAGEL

OilField Geomechanics LLC

Name Neal B. Nagel
Mobile: 832.327.9566
nnagel@ofgeomech.com

Years of Experience – 30+ yrs

OilField Geomechanics, Founder, Owner and Chief Engineer, 2014-present
Itasca Houston, VP of Engineering/Chief Engineer, 2013 (1 year)
Itasca Houston, Chief Engineer, 2009-2013 (4 years)
ConocoPhillips, Principal Engineer, 2002-2009 (7 years)
Phillips Petroleum Company, 1989-2002 (13 years)
Southern Illinois University, Asst. Prof. 1988-1999 (1 year)
New Mexico Institute of Mining and Technology, Asst. Prof. 1987-1988 (1.5 years)
Various consulting and summer jobs during grad school, 1982-1987 (1.5 years)

Degrees BS, MSc & Ph.D. – Mining Engineering, University of Missouri-Rolla

Industry Recognition, Committees and Activities

SPE

- SPE Distinguished Lecturer (2016-2017)
- Chairman, SPE Geomechanics Technical Section (2017-present)
- SPE HFTC Short Course on Geomechanics of Unconventionals (2016, 2017)
- SPE ATCE Short Course on Geomechanics of Unconventionals (2017)
- SPE Reservoir Description & Dynamics Advisory Committee, Geomechanics Subcommittee (2016-present)
- Chief Editor, SPE Solids Injection Monograph
- Member, SPE Monograph Committee (2005-2009)
- Member, SPE Drilling & Completions Subcommittee (2005-2012)
- SPE Distinguished Lecturer (2003-2004)
- Member, Program Committee, SPE ATW: Pore Pressure and Stress (2007)
- Member, SPE Drilling & Completion Director Selection Committee (2006)
- Member, Program Committee, SPE Forum: Well Failure (2006)
- Local SPE section officer (2000-2002)
- SPE Annual Technical Conference Well Completion Committee (1990-1994)

Other

- Expert Panel, Certifying Authority for Nova Scotia Utility Review Board: Alton Gas Salt Cavern(s) Development Project (2012-present)
- Testifying Expert Witness: Geomechanics and Salt Cavern Stability
- Doctoral Committee: K. Rodriguez, UCV, Petroleum Engineering School (2015-present)
- NSERC Grant Reviewer: 2016
- Paper Reviewer: ARMA, SPE, AJGS, AAPG, RMRE (2012-present)
- Contributing Author: Unconventional Oil and Gas Resources: Exploitation and Development, U. Ahmed & D.N. Meehan, Eds, CRC Press, 2016
- Contributing Author: Hydraulic Fracturing, M. Smith and C.T. Montgomery, CRC Press, 2015
- PTTC - Short Courses on Geomechanics of Unconventionals (2015)
- AAPG, URTEC Short Course on Geomechanics of Unconventionals (2015)
- ARMA Hydraulic Fracturing Technical Group (2013-present)
- ARMA Short Course on Geomechanics of Unconventional / Workshop on Geomechanics for Unconventionals (2013, 2015, 2016)

- SEG, AAPG, SPWLA, HGS, DGS, PTTC, SPE (Forums and ATWs) invited presentations (2011-2017)
- Sandia Salt Project, Phillips Petroleum Representative (1999-2002)
- Expert Witness: Ekofisk Subsidence Case, Norway (1996)
- Joint Chalk Research (JCR) Program Administrator (1996-1999)
- Joint Chalk Research project leader: Deformation-Related Well Performance in Fractured Chalk (1997-1999); Compaction and Surface Subsidence (1993-1996)
- Joint Chalk Research Geomechanics Expert Panel (1993-2002)
- API Subcommittee for Long-Term Conductivity of Proppants (1991-1993)

Current Position (2014 – Present)

Title: Chief Engineer & Principal – OilField Geomechanics LLC
24200 Southwest Freeway Suite 402 - #293
Rosenberg, TX 77471
Office: 832.327.9566

Job Responsibilities: Engineering Advisor: Geomechanics of Unconventionals; Hydraulic Fracturing; Wellbore Stability; Salt Modeling, Compaction & Subsidence; Solids/Cuttings Injection Engineering oversight, review, and sign-off on all projects.
Project proposals and marketing.
Principal Instructor: Geomechanics training – open courses and in-house courses for major and independent companies (Devon, Diamondback Energy, Pioneer, Noble, Whiting, YPF, Weatherford).

Professional Experience

2013-2014: VP of Engineering/Chief Engineer – Itasca Houston, Houston, Texas

Responsibilities:

Engineering oversight, review, and sign-off on all projects.
Technology Marketing and Client Relations.
Corporate strategies (engineering) and service strategies.
Budgeting (engineering) and project administration.
Engineer supervision, hiring, review.

2009-2013: Chief Engineer, Itasca Houston, Inc. – Houston, Texas

Responsibilities:

Engineering oversight, review, and sign-off on all Itasca Houston projects.
Support in company management and definition of product and service strategies.
Integrated project leader.
Project proposals and marketing.
Principal Instructor: Geomechanics training – 2 open courses a year and in-house courses for major and independent companies.
Supervision, mentoring, and review of young engineers.
Major Projects Development: Shell Marcellus, Haynesville, generic Unconventional geomechanics studies; Marathon Bakken study; Encana Horn River study; Talisman Montney study; PEMEX Chicontepec study; YPF Vaca Muerta study; Pluspetrol Vaca Muerta study; TOTAL Elgin study; Anadarko Nansen study; PEMEX KMZ study.

2002-2009: Principal Engineer, ConocoPhillips – Houston, Texas

Responsibilities:

Principal Instructor: COP Stimulation School
Principal Instructor: COP Global Wellbore Stability Course
Co-Instructor: COP Completion Skills Development Program

Co-Instructor: Completions/Geomechanics at COP Engineering Academy

Geomechanics Lead for performing world-wide geomechanics evaluations and provide geomechanics support for world-wide completions/stimulation and drilling operations. Major projects in: China, Qatar, Indonesia, UK, Norway, Alaska, Canada and Venezuela. Provide training on borehole stability, salt stability, hydraulic fracturing and completion technology for new-hire and experienced engineers.

Perform world-wide cuttings reinjection (solids injection) evaluations and provide on-going support for solids/waste disposal operations.

Lead and support reservoir characterization efforts (particularly geomechanics-related) for world-wide COP operations including geological characterization (fault/fracture geomechanics) and flow model development (implementation and analysis of model compressibility issues). Lead and coordinate subsidence technical service and research for COP Norway; develop and update subsidence forecasts and risk analyses for the Ekofisk and Eldfisk Fields; evaluate field data for determination of causes and trends in Ekofisk and Eldfisk subsidence; perform field compressibility and subsidence evaluations for world-wide operations. Borehole stability analysis for assets around the world.

Mentoring: Young/New hire engineers in geomechanics and stimulations

2000 - 2002: Senior Principal Reservoir Engineer – Phillips Petroleum, Bartlesville, OK

Responsibilities:

Coordinate subsidence research for PPCoN; develop and update subsidence forecasts and risk analyses, borehole stability for Ekofisk and Eldfisk; evaluate field data for determination of causes and trends in Ekofisk and Eldfisk subsidence; cuttings reinjection evaluations; general geomechanics investigations such as casing deformation issues.

Geomechanics Team Leader; coordinate joint geomechanics projects; communicate geomechanics issues and capabilities to management and SBU's; assist in the development and evaluation of team members.

Joint Chalk Research Geomechanics Project Leader; coordinate project group for the geomechanics project under JCR 6; draft project descriptions, contractor notifications, and contracts; technical liaison for PPCo to JCR group.

Phillips Representative to the Sandia Salt Project.

1999 - 2000: Senior Reservoir Engineering Specialist – Phillips Petroleum, Bartlesville, OK

Responsibilities:

Coordinate subsidence research for PPCoN under E230 program; develop and update subsidence forecasts and risk analyses for Ekofisk and Eldfisk; evaluate field data for determination of causes and trends in Ekofisk and Eldfisk subsidence; cuttings reinjection evaluations; general geomechanics investigations such as casing deformation issues.

Phillips Representative to the Sandia Salt Project.

1997 - 1999: Senior Reservoir Engineering Specialist – Phillips Norway

Responsibilities:

Coordinate subsidence research and analyses internally within Phillips, with co-

venturers, and with external research firms; develop and update subsidence forecasts and risk analyses for Ekofisk and Eldfisk; communicate subsidence developments with co-venturers and Norwegian authorities; evaluate field data for determination of causes and trends in Ekofisk and Eldfisk subsidence; and general geomechanics investigations (cuttings re-injection and casing deformation issues).

Team leader for the Produced Water Team, a multi-disciplinary team assembled to review produced water handling for Phillips' PL018 fields and determine solutions to new regulatory restrictions enacted by the Norwegian government.

Program administrator for the Joint Chalk Research Program, Phase 5 (JCR 5), a 17 mmNOK joint industry program of investigation into improving recovery and operations of chalk reservoirs; Project leader for the Well Performance project within JCR 5.

1995 - 1997: Senior Reservoir Engineer – Phillips Norway

Responsibilities:

Coordinate subsidence research and analyses internally within Phillips, with co-venturers, and with external research firms; Develop and update subsidence forecasts and risk analyses for Ekofisk and Eldfisk; Communicate subsidence developments with co-venturers and Norwegian authorities; Evaluate field data for determination of causes and trends in Ekofisk and Eldfisk subsidence; General geomechanics investigations (cuttings re-injection and casing deformation issues).

1993 - 1995: Associate Reservoir Engineer – Phillips Norway

Responsibilities:

Investigations of the causes and effects of reservoir compaction and subsidence; Development of finite element models for the modeling of reservoir compaction and seabed subsidence; and Forecasting of subsidence and horizontal motions.

1990 - 1993: Staff Reservoir Engineer - Research & Services Division, Phillips Petroleum Company, Bartlesville, Oklahoma

Responsibilities:

General geomechanics investigations; Coordination of hydraulic fracturing research; Team Leader for the Formation Completion Task Force; and Development of finite element geomechanics models for investigations of Eldfisk subsidence.

1989 - 1990: Visiting Assistant Professor of Mining Engineering - Southern Illinois University, Carbondale, Illinois

Responsibilities:

Teach Graduate and Undergraduate level courses in mining engineering including undergraduate level courses in surface mining and mine development and graduate level courses in strata control/subsidence; Principal Investigator for Illinois Mining and Mineral Resources Research Institute Project BM-USDI-G119: 'The Study of the Geostatistical Properties of Coal Quality Parameters of the Herrin #6 Coal Seam'; Co-Principal Investigator for National Mine Land Reclamation Center Project SIUC-01: 'A Study of the Change in Soil Matrix Potential of Prime Farmland Soils Due to Differing Deep Tillage Techniques'; and Faculty Advisor for student chapter of the Society of Geologists and Mining Engineers.

1987 - 1989: Assistant Professor of Mining Engineering - New Mexico Institute of Mining and Technology, Socorro, New Mexico

Responsibilities:

Teach Undergraduate level courses in mine ventilation, surface mining, introduction to mining, and mechanics of materials; Developed a Coal Royalty Verification Program for the New Mexico State Land Office; and Faculty Advisor for the Cooney Mining Club. Support for WIPP research project.

1982 - 1987: Part-time laboratory assistant for Haas & Associates Consulting - Rolla, Missouri

Responsibilities:

Select, prepare, and test rock samples for determination of rock mechanical properties for mine design and dam construction.

Projects conducted for (partial list): Exxon Coal Resources, USA; Amax Coal Company; Shell Oil Company, Mining; and Cominco American, Ltd.

1982 - 1987: Teaching Assistant - University of Missouri-Rolla, Rolla, Missouri

Responsibilities:

Teach the laboratory portion of the courses Rock Mechanics I and Mine Ventilation.

Summer, 1984

& 1985: Summer engineer - Rochester & Pittsburgh Coal Company, Indiana, Pennsylvania

Responsibilities:

Entry-level engineering work in the environmental permitting department.
